Outside Ticket Pocket:

Additional Charges (Outside Ticket Pocket) - £5 or \$7:

Ticket Pocket :	Please specify Yes or No
------------------------	--------------------------

Step 5 (Measurements)

We know that taking measurements can be a bit tedious, so we've worked hard to make it as easy for you as possible. Please help us to create the perfect fit for you by reading the instructions carefully and giving us the correct measurements.

What will you need?

- 1) A fabric measuring tape. Please avoid string or metallic measuring tape.
- 2) Assistance from another person as it can be very difficult to measure yourself alone with the necessary accuracy.
- 3) A well fitting shirt, pair of trousers (not jeans) and a suit coat/jacket.

When taking measurements:

- 1) Always take the true measurement. Never ever! pull the measuring tape tight or give any ease.
- 2) All measurements should be made to nearest 1/2 inch.
- 3) When taking the measurements stand upright, don't slouch or bend over to read the inches as this won't give you a true measurement.
- 4) Please provide us your actual measurements and don't just mention off-the-rack sizes you wear. A custom tailored item is designed to fit your unique specifications, rather than the rough-and-ready approximations and averages used in off-the-rack clothing.

Please Ensure:

To take every possible care when measuring and preferably take all the measurements twice as your garments will be solely based on these measurements and once tailored and shipped out we will in any circumstances not be held responsible for a poorer fit caused due to any incorrect or improper measurements provided by the clients.

Preferred Fit

In order to get the type of fitting that you like, we would ask you to indicate your preferred fitting style below. Our tailors would then add the appropriate allowances to improve the fitting of the finished product.

1- The classic fit adds 3-5 inches of fullness to chest, waist and hip measures (for e.g. if the actual chest measurement is 42 inches then choosing the classic fit would give a chest of 45-47 inches for the finished suit jacket).

2- Slim fit reduces this allowance to 2-3 inches.

3- The extra full option increases it to 5-7 inches.

Fit:	Please specify (Classic\slim\extra full)
